VestaEco VT

One-sided reinforced tape on paper carrier for connecting VestaEco V barrier.

One-sided reinforced tape on paper carrier for connecting VestaEco V barrier. VestaEco VT is used to connect VestaEco V vapor barrier joints to ensure its basic function - airtightness. VestaEco VT can also be used to repair any ruptures that occur during assembly with the continuity of the vapor barrier. The tape is characterised by very high adhesive strength, weather, UV radiation as well as aging resistance.

Product advantages:

- Ensures airtightness of the vapor barrier
- Ecological due to the paper carrier
- High mechanical strength due to reinforcement
- Durability of connections
- Easy installation
